Announcements

CosmoLex.ca...expands in Canada one license at a time. Officially we have had queries from Ontario, Alberta, BC and Saskatchewan for CosmoLex and have migrated data from legacy programs like PCLaw, ESILaw, Clio, Quick-books and Pro-Law. Migration from desktop solutions brings many questions by firms who have used some of these legacy programs for one or two decades! Yes decades. The most frequent complaint for the legacy has been constant hang ups or crashing and worst of all a lack of support from the developers.

The CosmoLex solution comes with a great price, hosting, storage, support and most of all encourages consultants like us to become certified at no cost to us to assist law firms from bookkeeping to consulting and implementation. I have encouraged many to join up and add CosmoLex to their service portfolio's. www.cosmolex.ca If you are shopping for a new solution please contact.

Are you looking for a backup solution? What is the difference? I am asked this daily.

New offices look into new Practice Management Solutions....

CosmoLex Certified Accounting Partner (CAP) Tips

Did you know you can import any time entry, expense and A/R using the CosmoLex import tools? If the firm is behind or just starting up the import tool may be the answer to importing many transaction at the same time.

Did you know CosmoLex also imports Statements of Account from The Conveyancer? This new feature implemented last month now brings the statement of account so you don't have to rekey the information in.

Did you know CosmoLex can merge with any prepared Word Document to customize any invoice, receipt or letter? Simply add the precedent to CosmoLex and this feature is shared with all users automatically.

Legal Remote BackUP— LRB Technology Alert!!!!

PCLegal's Legal remote backup— Updates client software. Our prices haven't changed but the GUI and software have been updated. Protect your crucial data that is not apart of the cloud based programs you are using. An important note is that you know which programs actually store data on you local machines and should be included in your backup. If you restructure file management or add new folders or even change the user profiles, the backup program used ALSO must be updated. Also be sure to understand if your data is stored here in CANADA, most Law societies require that data stays in Canada! Call today to learn more 289-821-4763
